Alliance Pipeline Receives FERC Waiver Approval

Pecan North Dakota to contract with Alliance for a new transportation agreement

CALGARY, Alberta – *October 30, 2008* – The Federal Energy Regulatory Commission (FERC) has approved a revision to the Alliance Pipeline L.P. (Alliance) tariff which allows Alliance to waive a gas quality specification on a first come, first served basis. This waiver will enable Pecan Pipeline (North Dakota), Inc. (Pecan North Dakota), a wholly owned subsidiary of EOG Resources, Inc. (EOG), to flow dense phase rich gas outside the liquefiable hydrocarbon specification currently contained in Alliance's FERC Gas Tariff. The Pecan North Dakota natural gas receipts will not have an operational impact on the Alliance system as this natural gas will be blended with much larger quantities entering from Canada, and the combined gas stream delivered to the Chicago market will remain within Alliance's FERC Tariff gas quality specifications.

"The FERC's decision shows a strong commitment to swiftly and effectively develop North Dakota's natural gas resources by utilizing existing infrastructure," said Murray Birch, president and chief executive officer, Alliance Pipeline. "We are very pleased, and appreciative of, the support we received for this application."

"Pecan North Dakota's planned Prairie Rose Pipeline is indicative of EOG's commitment to the development of the Bakken oil play in the region. We appreciate the support of the FERC, the State of North Dakota and other entities in helping to advance this important project," said Ray L. Ingle, president, Pecan North Dakota.

The location and design of the Alliance system is uniquely advantageous for North Dakota natural gas producers: the Alliance system runs through the middle of the Williston Basin and can also transport natural gas liquids thereby reducing the need for producers to build plants to process the gas before transporting to market. Additional unsubscribed capacity is available on the Alliance system in the United States.

The Pecan North Dakota Transportation Agreement has an initial term of 10-years with options for renewal. The new interconnection near Towner, North Dakota, is scheduled to be on-line in mid 2009.
